IT-1

The Interruption IT-1 from Audible Disease is a simple to use but very useful 4-channel kill switch. If your mixer doesn't have channel MUTE functionality, this is the pedal for you! Each channel is independent of each other and is controlled by a heavy-duty stomp switch. An LED for each channel lets you know if the channel is on or off – blue for on and red for off. Made with the absolute highest quality parts.

The Interruption IT-1 is powered with a standard adapter with a "barrel" type tip (9 volts DC negative center pin) only. Does not work with batteries. We recommend the **Visual Sound 1 SPOT** power adapter (available through NoiseFX).
