

# SPECIFICATION SHEET

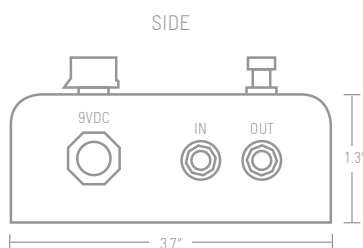

**Product Name:** The Barbershop Overdrive

**Product Description:** Less is more with this simple, original design. Handmade from JFETs matched to specs, this versatile pedal will treat your pickups with the respect they deserve. In return, they'll thank you with some of them sweet tones.

MADE IN CANADA

## OVERVIEW

### Drive

Sets the interstage gain of the amplifiers. More gain means more distortion. The very wide operating range allows you to go from relatively clean gain to a nasty distortion.

### Sag

The Sag control reduces the voltage to the amplifiers as you turn it counter clockwise, giving additional control over the character and feel of the saturation. The lower the Sag, the browner the sound. Full voltage is applied when the control is set fully clockwise. It is at this setting that the pedal has the potential to be its cleanest and loudest.

### Volume

Controls the output volume of the pedal while keeping the effect unchanged. This is where you have plenty of room to boost.

### Power

The Barbershop Overdrive can be powered by either a 9V battery or a typical 9V AC/DC adapter (9VDC, center negative).

Like most pedals, the input is switched in order to turn the pedal ON when a 1/4" jack is in place. If using a battery, to avoid draining it unnecessarily, always unplug the IN jack when not in use.

"Best overdrive pedal I've ever tried."

- Dave Hamelin, The Stills

"The sounds I get out of it are very clear and are essentially tonally similar to the sound I get when I turn my vibro champ to 10."

- Joel Cluff

## TECHNICAL SPECIFICATIONS

### Input Impedance

1 M $\Omega$

### Output Impedance

< 5 k $\Omega$

### Power Consumption

- Engaged: 5 mA
- Bypassed: 1 mA

### Frequency Response

45 Hz - 45 kHz  $\pm$ 3dB

### 30-day Money Back Guarantee

All products purchased through [fairfieldcircuitry.com](http://fairfieldcircuitry.com) come with a 30-day money back guarantee. If you're not completely satisfied with your purchase, send it back and we'll refund the price of purchase. We don't refund shipping costs and duties paid.

### Extended Warranty

Fairfield Circuitry will repair or replace any malfunctioning product for a period of 2 years after purchase date. Problems resulting from modifications or misuse may cancel this warranty. All shipping expenses will be covered by the owner. This warranty applies only to original owner of the product. Proof of purchase will be required. Contacting us before sending the defective product is highly recommended.
