

# Grp Synthesizer P12 – ENV FOLL

CV and Gate extraction from audio signal with Line/Mic selectable level

There is a pre-amped audio signal output

Panel Width: 6 HP

+12V = 18mA

-12V = 20mA

+5V = 0mA

## CONTROLS

**INPUT:** level for signal connected at port INPUT

**GATE LED:** lights when gate tension starts. Gate is available at GATE OUT port

**OVER LED:** lights when audio level overloads

**THRESH:** threshold level for generating gate

**ENV OUT:** attenuverter for CV at ENV OUT port

**LINE/MIC:** selection of input level

## CONNECTIONS

**INPUT:** audio signal input

**PRE OUT:** audio signal out after INPUT level control

**GATE OUT:** gate tension output

**ENV OUT:** output for envelope follower output
