

# QUAD LOPASS GATE - MODEL 292t

## OUTPUTS

**All** - Can use this output as a 4 to 1 (mono) audio mixer

**A,B,C,D** - Individual audio outputs. Can be used as a quadraphonic distribution mixer

## CV INPUTS

**A,B,C,D** - Control Voltage inputs for each audio channel

## BLUE KNOBS

These are manual volume/offsets for each channel

## BLUE SWITCHES

These select among 3 different modes:

**Gate** - A linear VCA (LED lit)

**Combo** - A combination of the linear gate and the lopass filter mode. It adds a subtle ringing decay to the audio (No LED, both LEDs not lit)

**LoPass** - A LoPass filter. Gives that "snap" when pinging it. (LED lit)

## INPUTS

**A,B,C,D** - Individual audio inputs

## \* Note:

Explore using the the **257t** to attenuate the an envelope going into the **292t** for a wider variety of timbres and responses

Size: 16 HP - Depth: 45mm

Power: +12V 87mA / -12V 36mA
